

Dimensioning of semi-finished products

Nominal size

The nominal size is the nominal dimension. This dimension is mentioned in all of our offers.

Generally, this size is specified by us and depends on your finished sizes.

Raw size

We mention a theoretical raw size in our offers. The raw size you can measure (after receiving the goods) will be within our tolerances.

Finished size

The finished size is the dimension of your finished part. We kindly ask you to always give us this size when making inquiries or orders, so that we can choose the most suitable form. If you need a special oversize, please let us know.

Example of the nominal size

Ø400 / 200 x 2000 mm

Example of the raw size

Ø409 / 191 x 2060 mm
 Ø400 (+3/+14) / 200(-3/-14) x 2000 mm

Example of the finished size

Ø397,45 / 205,65 x 1975,8 mm
